

## BLM 1: Flick Game Instructions

### Objective:

To obtain the highest personal and team score

### Overview:

You will flick a game piece along a game board as far as you can. The score is determined by the value of the last line passed by the game piece. Each team member takes three turns.

### Instructions:

- A) Tape at least 3 copies of the game board end to end, aligning them to form one long game board. Each game board represents 1 whole (so if you have 3 game boards taped end-to-end, you have 3 wholes that you are working with.) Tape down the ends to a table or the floor.
- B) Each team member takes turns flicking a game piece along the game board and recording the score on their score card. The score of each flick is the value of the last line on the game board the game piece crossed when it was flicked.
- C) Each team member completes the questions on their score card. This will include determining a total individual score and a total team score.
- D) Repeat this three times so that each team member has 3 scores.

## BLM 1: Flick Game Instructions

### Objective:

To obtain the highest personal and team score

### Overview:

You will flick a game piece along a game board as far as you can. The score is determined by the value of the last line passed by the game piece. Each team member takes three turns.

### Instructions:

- E) Tape at least 3 copies of the game board end to end, aligning them to form one long game board. Each game board represents 1 whole (so if you have 3 game boards taped end-to-end, you have 3 wholes that you are working with.) Tape down the ends to a table or the floor.
- F) Each team member takes turns flicking a game piece along the game board and recording the score on their score card. The score of each flick is the value of the last line on the game board the game piece crossed when it was flicked.
- G) Each team member completes the questions on their score card. This will include determining a total individual score and a total team score.
- H) Repeat this three times so that each team member has 3 scores.
