

Score Card

1. Record each of your scores by placing an X on the value using the most appropriate number line. You may use a number line more than once. Be sure to label your number lines appropriately.

2. Record each of your team mates best scores by placing an X on the value using the most appropriate number line. You may use a number line more than once:

3. Calculate the total of your own 3 personal scores using your choice of an **area, set or linear model**.

4. Determine your team's total score by combining **each person's highest score**. Represent your team's total score using a different model.

5. What representation (number line, area or set) makes the most sense to you? Why?
