BLM 2: Building a Stage

Student Name:	
---------------	--

You have been asked to build a stage for your friend's band. The total height of the base of the stage is $9\frac{1}{2}$ units.

Note: Diagram not to scale.

How thick is the fourth layer?

The base is made of four layers of materials.

The top layer is hardwood and measures $\frac{1}{16}$ units thick.

The second layer is plywood and measures $\frac{5}{2}$

 $\frac{-8}{8}$ units thick.

The third layer is a beam and measures $\frac{7}{2}$ units thick.

The fourth layer is underlay and is an unknown thickness.
