BLM 1: The Train Game

Instructions
1. Grab a handful of rods from the bag to build a train (join the rods end to end).
2. Record each rod length as a fraction on the chart.
3. Write a number sentence to represent the train.
4. Add the fractional quantities to determine the sum. The sum should be expressed as an improper fraction and as a mixed fraction.
5. Repeat to complete the recording chart.

One orange rod is always the whole ($1=\frac{10}{10}$).

Draw	Randomly Drawn Rods			Number Sentence (representing train)	Sum
	Colour	Fraction Value (per rod)	# of colour rods drawn
